Despite available adjustments to the rack, theres just no way to hold glassware safely. They are prone to being knocked over and broken. Weve lost quite a few. Wish Id purchased something else. Buyer beware! Please try again later. Please try again later. Herbert M Lindsay 5.0 out of 5 stars Rack structure works well. Soap holder is a little shaky same design as on my previous washer, which eventually became hard to use. Please try again later. Please try again later. Mother of Six 5.0 out of 5 stars And boy were we glad we did!!! In an 8 person household, when I get the chance to sit and relax after all the kids are in bed, the last thing I want is racket from a dishwasher reminding me of the work I just did. Noise pollution is annoying. This system does the trick.

And unlike some of the other reviewers, weve now had it a year and I feel that we are a good control group since we use this system DAILY at least one full load a day. By the way, my kids are bad about rinsing the dishes off IF they put them into the dishwasher, the dishes are pretty full of grime. He put his dishes into the dishwasher!!! I think this is his way of passive aggressive destruction because lots of parts are now clogged as is our sewer system up to the point that the unit wouldnt drain properly. Now I am sure this isnt Boschs fault. I hand cleaned much of the interior with soap and water to break the oil up and had to hand clean the prefilter by soaking it in a tub of suds and scrubbing it up. I really should have made the son take care of it but this is one of those times when passive aggressive behavior deserves more passive aggressive behavior. I will stop buying bacon and let the kid know he cant cook it in the house until he pays the plumber to come clean our sewer line. Oh, but my little scrub job worked. You just have to figure it out by the stinch or by the clunky noise when the system is choking on the rinsewater. All in all, I believe that this system will last us just as long as the system was preengineered to last. Probably just outside the warranty. But, while its working, Ill be keeping the salt reservoir filled and keeping the food particles tossed from the prefilter so it doesnt clog up oh, and my 18 year old son will be able to get his own place if he wants more bacon. Now I wouldnt say these things are dealbreakers. Most of these issues arise by the full force we give this system. But I enjoy reading the reviews and thought Id chime in about my own. Please try again later. Please try again later. Fred Frenchese 5.0 out of 5 stars The dishwasher is light enough to be maneuvered into place by one person and the installation was rather simple with the very complete instructions provided.

The operation manual is also clear and the controls easy to understand. The design is stunning all

stainless in the front, with a heavyduty handle and very nice digital display on the facade, although the actual touch controls are hidden on top of the door. The inside is stainless steel also, great at retaining heat. All accessories are high grades and we appreciate the adjustable top rack and removable silverware holders. As with all stainless appliances, its hard to keep it looking clean very long as it shows finger prints a lot more than painted appliances. So far, we have not observed any difference in our electric bill. I believe it also uses small amounts of water its a very small water line going to the washer and a few seconds are always enough to pump enough water for the program. Emptying is also very quick The cleanliness of the dishes is good on the Auto Wash program, which we have been using most. With the recommended drying agent, glasses and fine china come out looking very good with no water spot. Heavy soiled pots may need a little rinse before the wash, especially with some cakedon food, such as eggs. Plastic ware comes out OK from the top rack and, with the limited heat of this dishwasher, is not warped. The main reason why we decided on this washer is the noise rating the quietest we could find in our price range. And on this point, we were just blown away. The first time we turned it on, we had trouble believing it was running. Our kitchen is open to the living room and now, no need to turn up the volume on the TV when the dishwasher is running big difference from the old Whirlpool we had before. To me, this only is worth the high price tag. Even the water emptying into the sink pipes is very quiet. In general, I prefer simpler systems that are reliable and of high quality so I am very happy with this Bosch choice.

<http://dynamicnewsolutions.com/images/canon-rebel-eos-5-manual.pdf>

The drain basket rarely needs emptying, the dishes are clean and never damaged especially plastics, the washer is very easy to operate and most of all, its so quiet it still surprises us. We have had one hiccup when we moved to Costcos Kirkland liquid dishwasher detergent the dishes were no longer as clean as expected and it took us a while to figure out that going back to the tablets Bosch recommends for their machine would bring back the perfect performance. In the meantime, another liquid detergent gave us very poor results too cant remember the brand it seems that this dishwasher should be used with tablets only. Since going back to the recommended is it Finish. Its the ones with the red ball in the center tablets, we couldnt be happier. I also noticed comments about dishes not being dry. The only time the dishes are not completely dry is if you open the washer before the end of the program its a bit tricky because it sounds like nothing is happening anymore when it is drying; it is totally quiet but the display gives you a drying time. I wish all could be as satisfied as we are. Please try again later. Please try again later. Mark S. Holden 5.0 out of 5 stars This year we decided to replace our aging GE Potscrubber 900 dishwasher. I research the heck out of major purchases, and one of my friends used to work at an appliance store, so I quickly found Bosch had possibly the best reputation for dishwashers. After deciding to go with Bosch, it was just a question of which model. After looking over the choices, it boiled down to this one, or one model below. This one was quieter, and more energy efficient. Electric rates in Connecticut are high enough that I expect to make up the cost difference between the two models with electricity savings. So much for how I got here. Noise is not going to be a reason to postpone running this one. The racks have all sorts of adjustments most of the tines can be set at several angles ranging from 90 degrees to flat.

<http://dzkgjy.com/images/canon-rc-251-manual.pdf>

Have extra bowls to wash adjust a few tines. The top rack can be adjusted for height this allows me to fit the massive pot I use for brewing beer in the lower rack. The silverware basket keeps the silverware separated so each item gets clean. It has a gentle cycle thats good for delicate china and stemware. I was sorry to find the stemware holder is an optional accessory. We dont drink wine often, but its about the only thing that seems to be missing. So far everything weve put through this dishwasher has come out clean on one cycle. With our previous dishwasher, sometimes wed need to soak and scrub some things before putting them through a second run. Im using about half the soap

I used to use per load because it doesn't have or need a prewash cup for soap. The run time is longer than we were used to with our previous dishwasher. From my research I've found this is normal with more efficient dishwashers. Our longest cycle so far was 2 hours 25 minutes, and that was auto wash for a very full load with a sanitary cycle. You should use jetdry or a drying agent on every load. One reason it's so energy efficient is it doesn't normally add heat for drying, but you can tell it to add heat if you want. Still, with using jetdry, the dishes are always dry when we check. We expect to be in this house for many years, and looked at this appliance as a long term investment. So far, it looks like it was a good one. Please try again later. Please try again later. Iza 1.0 out of 5 stars Advantages it is indeed extremely quiet. Disadvantages everything else, starting with the quality of its main job. In our view, dishwashers are made to wash dishes. Almost by definition, the dishes we put in are dirty. When we take them out and they are still dirty, something is very wrong. When we called the technician the first time, he found a piece of a bone in the engine. Shouldn't the filter block any pieces of food large enough to damage the engine.

The second time there was no damage, just the nozzles got clogged with food particles. He advised us to rinse thoroughly all the dishes before putting them in. We do, and so far the dishwasher still works, even if the results are mediocre. But what good is the dishwasher if we have to wash the dishes manually before putting them in. The dishwasher is praised by Consumer Reports for its water conservation. As the salesman explained to us, it uses less water because it alternates between upper and lower racks. Which may explain why the wash times are so long. I doubt however, if we do conserve any water overall when the dish prerinsing is included. And less water means it gets dirtier, which often leaves smudges on the dishes. It may require another manual rinsing though. I think we would be much better off also from ecological point of view if the dishwasher uses more water and does the job right. There is also a number of other little irritating glitches. Touch controls are inconveniently located and not very reliable. Racks are too tightly spaced for bowls. Rack fasteners are small plastic pieces that can easily fall out and get lost beware if you have small children!. I would forget these issues if the dishes are washed right. But they are not! Please try again later. Please try again later. covcat 2.0 out of 5 stars Do not expect your dishes to be dry since they do not have a dryer, this is why they get energy ratings. There is always water on the dishes, even if you use delay and let it sit overnight. So much water that it will track on your floors as you are putting the dishes away. Don't be fooled by their DBA claims, it is not accurate. If you measure the sound during the pulsating noises it is no longer quiet. Loud enough that if you are standing in the kitchen you and your guests will hear it. There are times during the cycle that you wonder if it is on, it can be that quiet that is the decibel they state.

[cameronhaddock.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c6312db4b6---canon-p170-dh-ii-user-manual.pdf](http://cameronhaddock.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c6312db4b6---canon-p170-dh-ii-user-manual.pdf)

Too bad they don't state the actual sound when it is really working. The doors are no longer the heavy stainless they used to be. They now paint parts of the plastic fascia. They no longer have a latch so it is a direct pull, another way to cut down on production costs. The new silverware baskets have ledges in them for the purpose of making sure each piece gets clean. However you will not be able to put in as many place settings of silverware in the basket as stated due to the various levels. The fold over plastic that comes with the basket is so thin, it will easily cut with scissors. The 800 has a cutlery 3rd rack. You will not be able to fit the described piece place settings and any large cookware in the same load. The one thing that is correct about their claims is they do clean with food left on. It is also next to impossible to clog a Bosch. THATS IT! Unless you buy a 800 series all the above is true. The 800 series is the only one that is still made in Germany. The 800 also has a cutlery 3rd rack. Bottom line this is an extremely overrated dishwasher. I am a caterer I get to work on all brands of dishwashers in high end homes. When a product is only warranted by the manufacture for one year that should tell you something about the quality! Please try again later.

Please try again later. Plumbing Nightmares 1.0 out of 5 stars Thank goodness it had a display telling me what it was doing or I would be forever wondering !! Owned for close to 3 years, It was used maybe twice a week on average. Close Door Message appeared and would not start door was closed Reset unit, worked for a while Would then run cycle and never turn off Eventually would not even show any indication of life Repair man replaced control board no luck. Said needed more parts would return Repair man returned changed door sensor switch and pump as I understand.

OK I am sure that the unit could of been repaired maybe another repair man, maybe by replacing every part until the unit worked but at what cost. This whole process waiting for parts etc took the best part of 2 months. Now I am no dishwasher expert, My first was some piece of junk that came with the condo I purchased. It was old, noisy as could be but funny enough never failed, always washed the dishes. A few more nondescript contract type dishwashers in homes I moved into all seemed to do the job. So I have only ever purchased 3 units that I actually choose, A Kitchen Aid Architect Series very good machine however due to some tempered glassware breaking in the unit while on a wash cycle managed to cause damage so I decided to replace B The Bosch a very expensive item as dishwashers go and expected way more for my money than I got. C Currently a Maytag much cheaper model than A or B. Doing the job but its not apples to apples. Jury is still out on this one. I dont think I need say more. Please try again later. Please try again later. kgg 2.0 out of 5 stars We loved it! Its quiet and the dishes are always clean. But. if you open the door at the start of the cycle to stick in that lastminute spoon, it leaks water under the dishwasher. Then it will refuse to run the cycles until the water dries up. After awhile, the water underneath has an extremely unpleasant odor. After several repair calls to fix this, we gave up. This was about the time the panel on the top of the door cracked and pulled away from the door. The dishwasher still works, but our new Samsung same decibel rating as the Bosch is coming next week and I cant wait. Ive always relied on Bosch products but I will not buy another Bosch dishwasher again. Please try again later. Please try again later. We have 5 online manuals for this item!
