Canon ImageClass MF4100 Review

This laser flatbed three in one gadget, the Canon ImageClass MF4100, runs with impressive print speed for its classification, clocking in at 20 web pages per minute, as well as offers attractive attributes for copying, as well as scanning too, making it a superb buy for those trying to find a multifunction facility that does not include a fax modem.

The Canon ImageClass MF4100 is the first in Canon's 4100 series, whose various other versions include the fax capable Canon ImageClass MF4140 as well as MF4150. The MF4100 has just the same key hardware, but without the Super G3

In the event of major changes in the contents of this manual over a long or short period, Canon will issue a new edition of this manual. Indicates an item requiring care to avoid electric shocks. Indicates an item requiring care to avoid combustion fire. Indicates an item prohibiting disassembly to avoid electric shocks or problems. In the diagrams, represents the path of mechanical drive; where a signal name accompanies the symbol, the arrow indicates the direction of the electric signal. The following labels certify compliance with the CDRH regulations, and must be attached to all laser products that are sold in the US. Laser beam radiation may pose damage to eyes. Be sure not to disassemble the laser scanner unit. The host machines laser scanner unit cannot be adjusted in the field. Below is the block diagram. The laser driver emits laser diode according to the laser control signal and the video signal from the DCNT board. The following is the circuit diagram for laser control. The scanner motor is the 3phase DC brushless motor with hall element included, and is combined with the drive circuit. The following chart shows the control circuit for the scanner motor. Step 4 Transfer Transfers the toner on the photosensitive drum to a paper Step 5 Separation Separates the paper from the photosensitive drum 4 Fixing block The toner image is fixed on the paper. When there is paper in inside the machine, the leading edge sensor flag is pushed up with paper, and paper having is judged. After the machine completes the 1st print and the papers trailing edge passes over the delivery sensor PS803, the duplexing drive solenoid SL2 is turned on and the drive of the main motor M1 is transmitted to the delivery roller and the duplexing feed roller. SCNT board Operation panel Key SW ASIC F91 9.2 Power Supply 9.2.1 Protection Function. Using the error code, the service man can readily find out how to correct the fault by simply referring to the service manual. After sending MCF. <http://decorinter.ru/img/uploaded/drug-formulation-manual-free-download.xml>

However, as we are constantly improving our products, if you need an exact specification, please contact Canon. Before using the machine, please read the following instructions for your safety. Never attempt to disassemble the machine opening and removing its interior covers will expose you to dangerous voltages and other risks. For all service, contact Canon Customer Care Center, or a Canon Authorized Service Facility. Never lift the machine by any of its trays or attachments. This could result in fire or electric shock. Dust accumulation can prevent the machine from operating properly. Improper adjustment of other controls may result in damage and may require extensive work by a qualified technician to restore the product to normal operation. If you have to place the machine near a window, install heavy curtains or blinds. Make sure that no wet or humid objects come into contact with the machine. Do not place the machine in a cupboard or builtin If you notice anything unusual smoke, strange odors, Contact Canon Make sure the cord is not knotted or kinked.

If you use a cardiac pacemaker and feel abnormalities, please move away from this product and consult your doctor. If you encounter a problem with the machine's operation, try to solve it by using the information in Chapter 11. If you cannot solve the problem or if you think your machine needs servicing, contact Canon Customer Care Center at 18008284040 between the hours of 800 A.M. to 800 P.M. EST Monday through Friday and 1000 A.M. to 800 P.M. on Saturday. Online support for 24 hours is also available at the website. All rights reserved. No part of this publication may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language or computer language in any form or by any means, electronic, mechanical, magnetic, optical, chemical, manual, or otherwise, without the prior written permission of Canon Inc. This list is intended to be a guide only. It is an open system in which business proprietors can participate voluntarily. The standards and logos are uniform among participating nations. If the RJ11C jack is not present, installation cannot occur. Key telephone systems are not recommended because they send nonstandard signals to individual telephones for ringing and special codes, which may cause a fax error. This machine is not supported on Voice Over Internet Protocol VOIP. Do not connect this machine to an outlet or power line shared with other appliances that cause "electrical noise." Air conditioners, electric typewriters, copiers, and machines of this sort generate electrical noise which often interferes with communications equipment and the sending and receiving of documents. If requested, this number must be provided to the telephone company. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. See the Starter Guide for details.

Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five 5.0. To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. Connection to party lines is subjected to state tariffs. The telephone line should not be reconnected or the power cord plugged in until the problem is completely resolved. Users should contact Canon Authorized Service Facilities for servicing of equipment. Information regarding Authorized Service Facility locations can be obtained by calling Canon Customer Care

Center 18008284040. The telephone company also retains the right to make changes in facilities and services which may affect the operation of this equipment. When such changes are necessary, the telephone company is required to give adequate prior notice to the user. Operation is subject to the following two conditions These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures If such changes or modifications should be made, you could be required to stop operation of the equipment. If the CA11A jack is not present, installation cannot occur. The line should be a regular voice grade line or equivalent. Use one line per machine.

Key telephone systems are not recommended because they send nonstandard signals to individual telephones for ringing and special codes, which may cause a fax error. It should be independent from copiers, heaters, air conditioners or any electric equipment that is thermostatically controlled. The rated value is 120 volts and 15 amperes. The CA11A modular jack should be relatively close to the power outlet to facilitate installation. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment. L'abreviation IC precedant le numero d'enregistrement signifie que l'enregistrement a ete effectue sur la base de la Declaration de conformite indiquant que le produit est conforme aux specifications techniques du Canada. Ceci n'implique pas que le produit ait ete approuve par l'industrie du Canada. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment. This precaution may be particularly important in rural areas. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five. La terminaison sur une interface peut consister en n'importe quelle combinaison d'appareils, a la condition seulement que la somme des Nombres d'equivalence Ringer de tous les appareils ne soit pas superieure a 5. This means that the machine does not produce hazardous radiation.

These regulations apply to laser products manufactured from August 1, 1976. Compliance is mandatory for products marketed in the United States. For LGL paper, pull out the output tray extension first, and then open the paper stopper. The key lights green when the Sleep mode is set, and goes off when the mode is canceled. Also, press to return the machine to the standby mode. Lights when the machine has waiting jobs and stores the data in memory. Also press to see the next item in the menu. Also press to see the previous item in the menu. Displays selection, text, and numbers when adjusting the settings. It is also possible to see the standby display without having shown. The level of toner consumption varies depending on the type of documents printed. If your average document contains a lot of graphics, tables, or charts, the life of the toner cartridge will be shorter as they consume more toner. To purchase the Canon genuine replacement toner cartridge, contact your local Canon dealer or Canon Customer Care Center U.S.A. 18008284040, Canada 18006522666. The magnet inside the toner cartridge may harm these items. Do not open the bag until you are ready to install the toner cartridge in the machine. Print quality may deteriorate if the drum surface is exposed to light or is damaged. If toner becomes caked in the toner cartridge, it may become impossible to free it even by shaking the toner cartridge. Toner powder is flammable.

The toner level is displayed in the LCD at four levels. This is called "Daylight Saving Time." Note that the margin widths listed are approximate and there may be slight variations in actual use.
